

Ideas don't have guardian angels. They have us.

**Witte, Weller & Partner is one of Germany's foremost patent law firms and has its headquarters in Stuttgart. We are a reliable and competent partner in all matters related to commercial legal protection: patent law, trademark law, utility model and design right law, copyright law, software law and employee invention law – and also the related civil proceedings legislation and contract and license law.**

Our clients include both well-known medium-sized companies in Germany, Europe, USA, Canada, Japan and China and large-scale companies and groups. We also advise technology-focused start-up companies.

We think globally and act regionally. We do not regard the terms international, national, regional as being mutually exclusive. We adapt our structure to suit the personal needs of our clients. We are big when you need powerful backing. We are small when you want to take swift, flexible action.
